PCN EXAMINATION RESULTS NOTICE

IMPLEMENTATION DATE 1st APRIL 2018

This results notice is issued by BINDT Authorised Qualifying Bodies and may be verified through the BINDT Certification Records Office at Midsummer House, Riverside Way, Bedford Road, Northampton NN1 5NX , United Kingdom . Tel: + 44(0) 1604 438300 for answering machine out of office hours. Email: pcn@bindt.org

Authorised Qualifying Body	**NOBLE QUALITY EVALUATION PRIVATE LIMITED**	
Examination Point	**NQE TRICHY**	
Result refernce	**P2762-19**	
Examiner	**G.P.SELVAN**	
Moderator		
Invigilator	**N.RAJESWARAN,S.MOHANAKUMAR**	
Candidate's PCN number		
Candidate's Family name	**MADOUNI MBAMA**	
Candidate's Given name(s)	**CESAR CHANEL**	
Date of birth (dd/mm/yy)	**08/09/1985**	
Gender (optional)	**Male**	
Candidate has opted-in to BINDT marketing material (Y/N)	**N/A**	
Candidate's address	**B.P:10050 LIBREVILLE, GABON**	
Sponsor (if not employer)	**N/A**	
Address	**N/A**	
Candidates's telephone Country code/area	**+241-07003231**	
Candidates's email (required)	**madounischanel@gmail.com**	
Candidates's employer		
Training organisation	**NQE TRICHY**	
Exam Date (dd/mm/yy)	**02/02/2019**	
Examination type	**INITIAL**	
PCN document reference	**PCN GEN APP E1 ISSUE 9 REV A 1st JANUARY 2016**	
Product or industry sector	**6 WELDMENTS**	
NDT method	**21, MAGNETIC PARTICLE TESTING**	
Level attempted	**2**	
Examination parts & grades		
THEORY		
-GENERAL	**70%**	Pass
-SPECIFIC	**80%**	Pass
PRACTICAL		
-SAMPLE1&INSTRUCTION	**94.5%**	Pass
-SAMPLE2	**91.8%**	Pass
-SAMPLE3	**90.6%**	Pass
Overall grade	**80.8%**	
Overall result (pass/fail)	**PASS**	
Level awarded	**2D**	
Categories awarded	**h&v, Portable equipment & NDT Instruction writing**	
Retest allowed (if failed)	**N/A**	
Latest date for retest	**N/A**	
Issue date of results	**13/02/2019**	
Are all eligibility criteria met?	**YES**	
Authorising name & signature	**N.RAMESH**	

NOBLE QUALITY EVALUATION Pvt Ltd NQE excellence in quality TRICHY-1

Tiruchirapalli - 620 007, India

PCN Result Notice issue 21 dated 1 st APRIL 2018.This results notice is not a certificate of competence and should neither be tendered nor accepted as such. A record of certification is issued by the BINDT Certification Records Office within 14 days of the date of issue of this notice providing all examination and certification fees have been paid and the certification shall be valid from the date this notification is received by BINDT Certification Records Office not before.

GENERAL INFORMATION

The PCN scheme provides an independent central certification scheme embodying modern quality assurance requirements and a commitment to conform to European and international standards. The PCN Scheme is owned and managed by the British Institute of NDT (BINDT). Certificates are issued following success in a thoroughly searching examination conducted at BINDT Authorised Qualifying Bodies, and are valid for five years. After the first five year period of validity, certificates may be renewed following the submission of evidence of continuous satisfactory employment in the application of NDT. At the end of a second five year period of validity, recertification follows success in an examination which, in the case of Levels 1 and 2, consists of a practical test or, in the case of Level 3, a written test or compliance with a structured credit system.

PCN certificates satisfy the requirements of international standard EN ISO 9712 The qualification requirements of PCN (eyesight, training and experience) also satisfy the provisions of a number of other widely accepted national and international standards and guidelines.

Candidates who are successful in the qualification examination, but who have not yet acquired the experience necessary for certification should, when experience has been gained under appropriate certificated supervision (see PCN/GEN for detailed information), apply for PCN certification directly to the Certification Services Division of the British Institute of NDT with evidence of the requisite experience.

Employers may find it convenient to utilise the PCN system within their internal NDT personnel certification programmes (e.g., within SNT-TC-1A or EN4179 systems). Further guidance on any aspect of NDT personnel certification may be obtained from BINDT Certification Services Division.

The following Levels of Competence are covered by the scheme:

Level 1

An individual certificated to level 1 is qualified to carry out NDT operations according to a written instruction and under the supervision of level 2 or level 3 personnel. PCN level 1 certificated personnel have demonstrated the competence to set up equipment, carry out the test, record and classify the results in terms of written criteria, and to report the results. Level 1 personnel have not demonstrated competence in the choice of test method or technique to be used, nor for the assessment, characterisation or interpretation of test results.

Level 1D

As above: distinction level.

Level 2

This level is qualified to perform and direct NDT according to established or recognised procedures and have demonstrated competence to choose the technique for the test method used; set up and calibrate equipment; perform and supervise the test; interpret and evaluate results according to applicable standards, codes or specifications; define the limitations of application of the testing method for which they are qualified; understand and transform NDT standards and specifications into practical testing instructions adapted to the actual working conditions; prepare written test instructions; carry out and supervise all level 1 duties; organise and report the results of non-destructive tests.

Level 2D

As above: distinction level.

Level 3

Personnel holding this, the highest level, are qualified to direct any NDT operation for which they are certificated and: assume full responsibility for a test facility and staff; establish and/or validate NDT instructions or procedures; interpret codes, standards, specifications and procedures; designate the particular test methods, techniques and procedures to be used. Level 3 personnel have demonstrated: a competence to interpret and evaluate test results in terms of existing codes, standards and specifications; possession of the required level of knowledge in applicable materials, fabrication and product technology sufficient to enable the selection of methods and techniques, and to assist in the establishment of test criteria where none are otherwise available; a general familiarity with other NDT methods; the ability to guide personnel below level 3. Where level 3 duties regularly require the individual to apply routine NDT by a method or methods, BINDT recommends that industry demand that this person should hold and maintain level 2 certification in those methods.

Level 3D

As above: distinction level.

Code	Sectors (Industry)
1	Aerospace
2	Pre and in-service inspection
3	Railway maintenance
8	Radiation

Code	Sectors (Product)
4	Castings
5	Forgings and wrought products
6	Weldments
7	Tubes and pipe

Code	NDT Methods & Techniques
20	Eddy Current
21	Magnetic Particle Testing
22	Liquid Penetrant Testing
23	Visual Testing
24	Ultrasonic Testing
25	Radiography
26	ACFM
27	TOFD
28	Phased Array
29	Computer Radiographic Testing
30	Digital Radiographic Testing
31	Guided Wave
32	Weld Inspection
33	Radiography (welds) Aero
34	Radiographic Interpreter

Code	NDT Methods & Techniques Cont.
35	Computer Radiographic Interpreter
36	Digital Radiographic Interpreter
37	Phased Array Interpretation
38	Basic Radiation Safety
39	Radiation Protection
40	Railway Axles
41	Rail (NR/055)
42	Rail UT Welds
48	Thickness measurement & corrosion monitoring

Scopes of Competence
X-rays
Gamma rays
Dye penetrants
Fluorescent Penetrants
Fixed installations
Portable equipment
Composite materials
Materials and components
Structures
Light metals
Dense metals
Plate
Bars and Billets
General Forgings
Condenser Tubes
NDT Instruction Writing
Critical defect sizing
Single frequency
Multiple frequency
Butt welds in plate
Butt welds in pipe
'T' joint welds
Nozzle welds
Node welds
Wavemaker
Teletest
MSS
ISO 20807 inspection of Wrought Plate
Steel Components
